Respected Sir,

I would like to state that we are running a small training center in the field of electronics and instrumentation for the needy students. You may kindly visit our website www.instrumentationstudy.org and the related link of our president, www.nbmanik.in.

In this centre we try to provide some exposure to some young students and also try to grow a general awareness among the common people in the field of electronics and instrumentation. The activity of this centre will be helpful to grow interest of our young students in this field. So far our activity has been appreciated by many people.

To run this centre we do not take any such donation. By providing some services we try to earn some money which we use to run this centre. We have some exposure in this field for a quite a long time. There are many services which we may provide on request. One may get some idea about one link of our president, <http://www.nbmanik.in/consultancywork.html>. We have a small group where we design, fabricate and also survey the market of different products. From our market survey we provide information to the respective manufacturer of the product regarding its improvement, modification etc. Our suggestion help the manufacturer to get some benefit.

You are one of the best manufacturer of electric fan. Our survey indicates that there is a requirement from the people about this product. I hope it is also possible for you to fulfill their requirements just by adding one feature in your product. If you include this in your product we believe you may get some advantages and also it will be more acceptable by the people. If you like you can contact us to discuss about it.

In case you do not contact we will approach to other manufacturer of this product.

I hope you will definitely contact us to discuss about this matter.

With best regards,

Pallab Das (on behalf of the President)
