

Different business ideas : may be helpful for Unemployment Problem

Our vision for introducing this section :

The vision is to encourage the unemployed persons by showing different aspects of business possibilities of our society.

Considering the unemployment problem I like to add some business possibilities where different people may show interest to set up their own business. Many other may be associated in their group. A significant mass may be involved and benefited. Our society in general will also get some value added services. Unemployed persons may get some confidence. Big industries may also execute some of their jobs by sharing with these small group by providing suitable exposure to them. Irrespective of our age, sex, education, caste etc different persons may find some suitable scopes to be involved. I am mentioning few business ideas and in course of time will try to show its feasibility for implementation, as far as possible. We believe that each and every one have a scope to get a suitable job. Considering the total population suitable business possibilities should be addressed. Attempt should be done so that each and every work get sufficient social status.

To prepare this data bank I have taken help of different sources. This data bank has been prepared by surveying the opinion of general people from different sectors, searching from literatures, internet and other sources to specify different needs/trends in these areas. Based on those ideas and including my own experience I have tried to find its feasibilities in our case. The feasibilities may alter from situation to situation. Suggestions of the policy makers of the governments, industries, organization and institutes may also be useful. I also invite them to come up with their opinions to enrich this data bank.

One group may be formed to provide different suggestions and solutions of different problems related to implementation of the business. Scientist, researchers, manufacturer of instruments, business people, accountants, lawyers and other respectable person from different professions may come up and help in this regard.

Involvement of different sectors are needed to shape any business. Different steps such as shaping of an Idea, experimentation of the idea, prototype product is the first step. In second step searching the suitable market possibility, collaboration of investors for financing the product at different stages, marketing agency, distributors, share holders and different advertising agency should take different role. Proper analysis of the project will be helpful to draw the attention of different sectors. Suitable network is also be developed accordingly. For any one who is interested in business along with the profit different aspects such as social aspects, his own capability and limitations should also be considered in care. Safety, security, social status is also important. Whenever there is coming any business in the market always different possibilities also take its place in connection with this business. This will also be a key issue to find new business ideas. Anyway, I will just mention some business ideas. I hope there are many literatures on these issues. Our tusk only to discuss about the feasibilities of implementation.

List of possible Small Business Ideas : (This may be extended gradually)

(This list has been prepared searching from different sources. Some of the ideas has been introduced by us.)

1. Administrative Assistant
2. Advertising Agency
